Center Line Indicator

MCB-140S · MCCB-140S

MCB-140S

■ **Compact and low price.**

A compact design as well as a low price have been achieved.

■ **A design with more safety considerations.**

Incorporating multiple technologies, a high degree of visibility has been realized so that even dangerous curves can be assessed from a distance.

■ **Dual product line caters to types of center line.**

Two types of indicator are offered for use on curves. One is suitable for the straight lines, the other for the curved lines themselves.

Installation Example
